

*B3*

21. (Amended) The method of claim 20, wherein, prior to inserting the packing member, the container is positioned on the pallet such that the first wall faces upward away from the top of the pallet, and after inserting the packing member, resetting the container body on the pallet by turning the container body upside down such that the opening faces upward and the first wall faces the pallet.

*B4*

27. (Amended) The method of claim 25, wherein, prior to inserting the packing member, the container is positioned on the pallet such that the first wall faces upward away from the top of the pallet, and after inserting the packing member, resetting the container body on the pallet by turning the container body upside down such that the opening faces upward and the first wall faces the pallet.
